Professional Summary

Data-driven Computer Science undergraduate with hands-on experience in analytics, SQL, Python, and dashboard development. Experienced in analyzing large datasets, identifying business insights, and presenting findings through clear visualizations and storytelling. During my internship, I worked on customer analytics and KPI reporting to support data-driven decision-making. Known for strong analytical thinking, problem-solving, and the ability to collaborate effectively with cross-functional teams to deliver business value.

Technical Skills

Languages: Python, SQL, Java
Data and Analytics: Pandas, NumPy, Matplotlib, Excel, Power BI
ML Frameworks: PyTorch, TensorFlow, Scikit-Learn, Keras
Tools: Git, GitHub, Jupyter Notebook, Google Colab
Soft Skills: Analytical Thinking, Collaboration, Data Storytelling, Problem Solving, Communication

Experience

Data Science Intern Jalgaon Janta Sahakari Bank Ltd. **April 2026 - June 2026 | On-site**

- Analyzed 400,000+ FY 2025–26 banking customer records; identified 17,000+ new customer accounts for targeted acquisition campaigns and behavioral segmentation analysis.
- Performed end-to-end data preprocessing and EDA on customer demographics, banking scheme distribution, digital banking adoption rates, and quarterly trends to surface actionable business insights.
- Developed an interactive banking analytics dashboard using Streamlit and Plotly for real-time KPI visualization, collaborated with operations team to translate findings into strategic recommendations for customer retention and digital channel adoption.

Projects

ChurnSense Pro Python, Scikit-Learn, XGBoost, SHAP, KMeans [Link](#)

- Developed an end-to-end **customer churn prediction system** on a 440K+ record dataset, by applying feature engineering, preprocessing pipelines, and stratified model validation.
- Trained multiple classification models — Logistic Regression, Random Forest, XGBoost, and LightGBM — and built a **Stacking Ensemble** model to improve ROC-AUC and predictive generalization.
- Conducted **cost-sensitive modeling** and ROI simulation to optimize retention strategies using probability threshold tuning.
- Used **SHAP** (SHapley Additive exPlanations) for model explainability and **K-Means clustering** to identify key churn drivers and segment high-risk customer cohorts.
- Deployed **interactive churn risk analytics dashboard** using Streamlit, enabling non-technical stakeholders to visualize predictions and business insights.

BleedDetectX Python, Keras, PyTorch [Link](#)

- Developed end-to-end deep learning models (U-Net, ResNet-UNet, DMP-WCEBlendNet) for **gastrointestinal bleeding detection** using Wireless Capsule Endoscopy (WCE) images.
- Achieved a Dice Coefficient of **0.812** and classification accuracy of **98.31%** on the test dataset using DMP-WCEBleedNet.
- Built ResNet-UNet **leveraging a pre-trained ResNet-34 encoder** for simultaneous bleeding classification and segmentation.
- Assessed model performance** using Dice, IoU, Precision, Recall, and F1-Score to ensure robustness, generalization, and clinical reliability.
- Anticipated publication and conference presentation in the domain of Emerging Digital Intelligence and Generative Engineering.

Education

Vellore Institute of Technology <i>B.Tech in Computer Science Engineering</i>	Bhopal, Madhya Pradesh <i>2023 – 2027</i>
---	---

Certification

- Oracle Cloud Infrastructure 2025 Certified Data Science Professional
- Applied Machine Learning Specialization– Coursera
- Google Skill Badge: Inspect Rich Documents with Gemini Multimodality and Multimodal RAG (Vertex AI)
- Google Skill Badge: Prompt Design in Vertex AI

Extracurricular Activities

Core Member, Mharo Rajasthan Club	2024 - 2025
• Created promotional materials and branding collateral; coordinated cross-functional teams to plan and execute large-scale cultural events attended by 400+ students.
